When and How will you get your Lab Results?

As most of you know, we have labs that we perform at CFP and labs that are done in-house by Labcorp Inc.

Some labs can take up to several days or even weeks to return. As each lab returns, they are placed in your chart, given to the provider to review, and then given to the medical assistant to call or mail you the test results. You will be notified within 1 week after results are received. If you have not received a call or a letter regarding these test results after 2 weeks, please call the office at 828-254-2444.

Pap Smears and Other Pathology (ex: biopsy) Results

These reports take 7-10 days to return to our office. Once received, they are reviewed by the provider and given to the medical assistant to contact you. Please allow at least 2 weeks for these results.

Abnormal Results

You will be notified by phone as soon as we get these results. Please make sure that our office has a **current phone number and address** where you can be reached.

Lead Level Results

These take 30 days to reach our office.
